## Our Motto:

**"Comfort Dental Care" is our philosophy. With us you aren't just another number. That's because we don't just treat teeth and gums, we treat people."**

*What has changed:*

\* Dr. Brockmann recently received his PhD in Pharmacology. Along with working in our office, he is a professor at UMKC School of Dentistry. He continues to use his knowledge to not only treat but educate as well.

\* We've recently had a new 3 ft illuminated sign installed so that you will never have trouble locating our office.

\* New patients are very welcome in our office. To show how much we appreciate referrals, we want to reward our patients by crediting their account \$25 (not redeemable for cash) when referrals are made. It's our little way of saying "thanks".

\* We have added a few new additions to the Russian art gallery, so feel free to take a look.

Here at Comfort Dental Care we have been very busy making the dental experience a better one for you and your family. There have been many changes in our office since the last newsletter and we apologize for the *slight* delay, but hopefully you can continue to stay informed through our newsletter. Again, if you have any feedback or even future story ideas please feel free to e-mail us at [newsletter@comfortdental.net](mailto:newsletter@comfortdental.net).

Diana Tabakh, DDS

## Old Smiles Replaced By New Ones

If you find yourself coming in for appointments primarily in the evenings and on Saturdays, you are most likely familiar with two certain smiling faces. Lindsey Eagle, working here for primarily 2 ½ years, and Anna Tabakh, employed for about 4 ½ years, have helped bring their unique personalities to our office in order to make our dental family feel complete. However it is time for them to embark on the next stage in their lives by attending the University of Kansas in Lawrence this fall. Since they will be living on campus, they will no longer work at Comfort Dental. Lindsey is planning to major in Business while Anna has yet to decide. We will be sad to see them go, but are very eager to see what bright futures are in store for them.

Natalie Foster, who is planning to attend hygiene school at UMKC in the near future, is our new addition to the Comfort Dental staff. She is excited to join our dental team in order to help you achieve the smile that you've always wanted. Her great sense of humor and outgoing nature will help our dental family feel complete once more.

## Invisalign

These days Americans seem to be fascinated with reaching what they would consider to be a state of perfection. Along with the flawless body, a picture perfect smile has always seemed to be but a distant dream. However a new technology called Invisalign has enabled over 135,000 people to gain back the confidence that they once lacked from having crooked teeth. We are pleased to inform you that Comfort Dental Care has also joined the effort to improve America's smile with Invisalign. This program works by using a 3-dimensional computer imaging technology to illustrate the complete treatment plan from the initial position to the final desired position from which a series of custom-made "Aligners" are

*The 4 key benefits of Invisalign:*

*1. Invisible- Straighten your teeth without the embarrassment of a mouth full of wire.*

*2. Removable- Straightening your teeth doesn't mean that your oral hygiene has to suffer. You can eat, brush and even floss your teeth as you normally would.*

*3. Comfortable- You don't have to worry about metal brackets causing mouth irritation and there is less time in the dental chair for adjustments.*

*4. Virtual treatment plan- You can view your own virtual treatment plan before you start so that you are able to see what your smile will look like at the end of the treatment.*

produced. Each of these "Aligners", which are made of seemingly invisible medical grade plastic, is worn for about two weeks and then replaced by the next in the series until the final desired position is achieved. The dental world has sometimes referred to Invisalign as "the contact lenses for teeth."

Dr. Tabakh has recently been certified as an Invisalign provider by successfully completing an Invisalign course. Being the quality oriented dentist that she is, she is first starting with simple cases. If you are interested in straightening their teeth with this new technology make sure to let Dr. Tabakh know during an exam. If you are eligible, she will be happy to get you on your way to straighter teeth with this system.

**ONLY A DENTIST CAN GET YOUR TEETH THEIR WHITEST**

Special: Bleaching now \$200 for both arches (reg. \$300)

trouble dealing with trays or simply cannot afford Nite White. Crest Supreme Whitestrips are thin, flexible strips that are to be worn on upper and lower teeth for thirty minutes once a day for a period of 21 days. This treatment is more limited because instead of bleaching all the surfaces, it whitens only the front upper and lower teeth. Along with a 21 day supply of Whitestrips, this package includes Vivid White toothpaste along with a Crest Spinbrush so that you can maintain your white smile for many years to come. We invite you to try these two systems because you truly will be amazed at how much difference a whiter smile can make.

Now that Invisalign has helped you get the straight teeth that you have always wanted, is your smile not quite as bright as you could have wished for? In this case you may want to look into bleaching your teeth.

Our office now offers two professional teeth whitening systems. The first is a system called Nite White where whitening gel is put in custom fitted trays and worn by patients at night while they are soundly sleeping. Nite White is very unique because it bleaches all the surfaces of all of your teeth. Maximum results through this system can be achieved when it is worn for 10- 14 consecutive nights. However the consumption of coffee, sodas and smoking will slow any bleaching system.

We have an alternative system available for those patients who have

Special: Crest Professional Whitestrips which are only available thru your dentist now \$45 (After \$10 mail-in rebate)
